

Name: _____

Date: _____

Quadrilaterals

Solve for x. Show your work.

1. True or False: A rectangle has 4 sides
2. Name a property of a rhombus.
3. Name a property of a square.
4. True or False: A rhombus has 4 equal sides
5. What quadrilateral has opposite sides equal and parallel, but no right angles?
6. True or False: A rectangle has 4 sides
7. True or False: A parallelogram always has right angles
8. What quadrilateral has opposite sides equal and parallel, but no right angles?

Quadrilaterals – Answer Key

1. True or False: A rectangle has 4 sides
Opposite sides are parallel
2. Name a property of a rhombus.
Opposite sides are parallel
3. Name a property of a square.
Opposite sides are parallel
4. True or False: A rhombus has 4 equal sides
5. What quadrilateral has opposite sides equal and parallel, but no right angles?
6. True or False: A rectangle has 4 sides
7. True or False: A parallelogram always has right angles
8. What quadrilateral has opposite sides equal and parallel, but no right angles?

Parallelogram
False
